

Combining Dr. LEVY Switzerland®
with your aesthetic treatment portfolio

Why
Dr. LEVY
Switzerland®

The Medi-Luxe® brand
Setting a new standard for
non-prescription cosmeceuticals

Dr.
LEVY
SWITZERLAND

we are

- ✕ developed by Switzerland's number 1 aesthetic injector
- ✕ based on the 2012 Nobel Prize-winning research
- ✕ leaders in stem cell and epigenetic biotechnologies
- ✕ protected by a global patent + supported by clinical studies
- ✕ creators that go beyond today's "want" to anticipate tomorrow's "needs"

medi.

we are

- dr P L designed & made in Switzerland
- dr P L devoted to the Swiss tradition of high-precision excellence
- dr P L committed to infusing “perfection” into the finest details
- dr P L dedicated to surprising with the unexpected “wow_s”
- dr P L making every minute, every day count because time is luxury
- dr P L only satisfied when we over-deliver on expectations

luxe.

we are

-  100% certified vegan & cruelty-free
-  up to 95% of natural origin
-  free of more than 2700 ingredients
-  made of carefully picked actives and sources
-  socially engaged for our communities, near and far
-  never satisfied with the status quo

conscious.

*« You may not remember how your skin was 20 years ago.
But your stem cells certainly do. »*

Advanced Therapies

to power in-clinic treatments

Dr.
LEVY®
SWITZERLAND

Protocols

For optimal results with your clinical therapies

1. Radiofrequency (monopolar or bipolar)
+ HIFU + Ultrasound
2. Chemical Peels (mild / moderate)
3. LED
4. Microneedling
5. Microdermabrasion
6. IPL (vascular | pigmentation | photorejuvenation)
7. “Inject Advancement” integrated package

Important

Essential notes from Dr. LEVY Switzerland® and
Healthxchange

These protocols are clinical examples of what can work within multi-modality treatment utilisation, as conducted in clinical studies via Healthxchange in collaboration with Dr. LEVY Switzerland®, covering a range of ages and skin types. It is at the discretion of the practitioner to ensure that the patient is clinically suitable and assessed accordingly for relevant treatments, due diligence should be taken with regards to manufacturer guidelines and parameters used.

1 Radiofrequency, HIFU, & Ultrasound

Devices examples:
Sofwave, UltraLUX Pro, Endymed, Thermage,
Ultherapy

RF, HIFU and Ultrasound

doubling the treatment's power

⌘^{dr} 2-in-1 collagen growth

- ▶ R.F. or U.S. via waves therapy and heating
- ▶ Dr. Levy via plant-based revitalisation of both epidermal + dermal stem cells

⌘^{dr} Immediate bioavailability of essential nutrients

Dr. Levy's ultra-concentrated blend of stem-cell-activators, hyaluronic acid, vitamins & peptides can be immediately assimilated deeper into the skin.

⌘^{dr} Increased active ingredient penetration

via the heated skin and enlarged pores from the therapies.

⌘^{dr} Protect the skin from environmental damage

thanks to the epidermis-rebuilding and –protecting Pollution Shield.

2 Chemical Peels (mild / moderate)

Examples:
Obagi Blue Peel Radiance,
Jan Marini, Medik8

Chemical Peels

Healing, repair and boost

- dr
P X L Immediate bioavailability of essential stimulators
Ultra-concentrated nutrients penetrate deeper & be available to the deeper layers.
- dr
P X L Beyond peeling: deep stem cell stimulation
Patented formula can reach the stem cells they target better reactivation.
- dr
P X L Protect the skin from environmental damage
thanks to the epidermis-rebuilding, anti-oxidant powerhouses (e.g. in the Pigment Control Drops) and –protecting the skin (e.g. Pollution Shield).
- dr
P X L Enhance comfort from the peeling procedure
Both in the clinic and at-home to help faster healing.

6 IPL & Laser photorejuvenation

(vascular | pigmentation | photorejuvenation)

Examples:

Lumenis M22, Alma Harmony, BBL,
UltraLUX Pro

IPL & Laser photorejuvenation

(vascular | pigmentation | photorejuvenation)

Correcting and rebuilding skin

Amplify IPL results

IPL smooths and brightens the surface; Dr. LEVY regenerates the structure — for firmer, visibly younger-looking skin.

Correct hyperpigmentation at every phase

IPL breaks up visible pigmentation at the surface and upper dermis; the Pigment Control Drops enhances the work at the cellular level.

Protect the stimulated skin from environmental damage thanks to the epidermis-rebuilding and –protecting Pollution Shield.

Support the Skin's Recovery and Comfort Post-IPL Help faster healing and soothing of the skin.

7 “Inject Advancement” home package

Examples:

Polynucleotides, Skin boosters, Dermal fillers,
Biostimulators

Injectables x Dr. LEVY

Complementing with skin regeneration & rebuilding

Enhance injectables results (in-clinic), at home

Injectations treat key causes and symptoms of ageing (muscle movements, loss of collagen, saggy skin) from the inside-out, while Dr. LEVY Switzerland® is proven clinically to visibly regenerate and rejuvenate superficial skin from the deeper dermis all the way to the superficial epidermis.

Adding anti-pigmentation benefits to any and all therapies

Dr. LEVY Switzerland's Pigment Control Drops enhances any anti-ageing therapy with a clinically-proven anti-pigmentation treatment that works at the roots of all types of pigmentation; with no need for intrusive, prescription-based treatments.

Protect the skin from environmental damage

All Dr. LEVY Switzerland's heroes (serum, creams, masks) contain bio-mimicking complexes that rebuild the skin's natural protective barrier. Additionally, the brand's unique full-spectrum Pollution Shield blocks external damages from its first usage, against all types of pollution (outdoor, indoor, ozone, infrared, blue light).
